Mushroom Palace is Dreu Ferguson Sr. and Brian Hulitts collaboration into the psychedelic folk blues dimension. Hulitts words and Fergusons guitar establish the album from the beginning with title cut Mushroom Palace, a drug lyric upbeat folkrocker, followed by the 60's sound of The Essence which is a psychedelic chant put to music complete with whispers, druggy references, 60's guitar etc. then comes the killer electric guitar cut Maelstrom with great lyric and guitar playing. As the album evolves into more of a folk blues direction, great cuts Without a Face and History Following Me stand out. The humorous rocker Bad Weather Mama is also a fun spot. There is a Dylan esque cut If I Disappeared Today and spoken word cut Words of Whispers complete with a tape loop and backwards guitar! Not too forget the 60's pop sound of Price of Love and the drug chant Painting, Mushroom Palace is an ambitious effort qualifying for inclusion in several genres. A two man effort, the album has a private underground feel to it throughout which contributes to it's charm. Lyrically fantastic, Hulitt exorcizes demons of drugs,the bottle, women and death,culminating in the hopeful and beautiful "Even If". Ferguson's guitar playing is on target throughout with a nice touch of wahwah on "Easy Prey To Time" and dobro on "History Following Me". The cover art is great front and back with visions of psychedelia heaven 'neath a mushroom.. Close Your Eyes...Open Your Mind... We bid you welcome to the Mushroom Palace....
