A now out-of-print EP of painterly Midwestern gothic story-songs... moody, uplifting, beautiful, and scary. 5 MP3 Songs ROCK: Americana, ROCK: Roots Rock Details: The Letterpress Opry are Iowa's answer to the surrealistic existence of genetically engineered pigs. Grown in the deep, black soil of the American Midwest, The Letterpress Opry sound like a Brechtian back-alley tractor race between Doc Watson, Camper Van Beethoven, The Band, Wilco, and Johnny Cash (on a bad hair day). -----PRESS----- "This wonderful, passionate roots band has brought a welcome new mix of old sounds to the local scene of late. Folk, gospel, country-rock, hillbilly music and echoes of The Band are all rounded up under the group's musical tent... Sycamore Tree (is) a rousing five-song debut EP that covers an amazing amount of turf in just over 26 exhilarating minutes." -Jim Musser, Iowa City Press-Citizen "Both sweet and startling, the music of this roots band delivers a passionate and sometimes haunting slice of Americana." -Ben Keiffer, WSUI
