All the compositions are based on George Russell's Lydian Chromatic Concept, spontaneous burning jazz improvisation on top of Brazilian flavor with touch of Japanese spice. 9 MP3 Songs JAZZ: World Fusion, JAZZ: Latin Jazz Details: "Hiro Honshuku is a man of many parts virtuoso flutist, imaginative composer, capable visual artist and gifted teacher. A composer is always heartened to learn he has been an influence in a musician's life; Hiro has taken what he learned from the Lydian Concept and used it as I had intended it to be used to fashion his own unique voice. Drawing from his experience of growing up in Japan, studying European traditional music, and coming to the jazz idiom as a young man, his music is pan-cultural and compelling. He is supported superbly by Gustavo Assis-Brasil on guitar and Jos Pienasola on bass; this ensemble listens to each other, and the result is a very worthwhile musical experience. " - George Russell
