Melody-driven pop songs of love, lust and obsession with rock, blues and jazz to spice them. 10 MP3 Songs POP: 90's Pop, ROCK: Folk Rock Details: Growing up, I loved singing along to the radio. The first song I ever learned was "Shop Around" by Smokey Robinson and the Miracles...I have been a fan of his ever since! In college, I was fortunate enough to sing second tenor in a close-harmony, a chapella group, The Krokodiloes for two and a half years before setting out on a solo career. One too many renditions of "Wind Beneath My Wings" convinced me that I should have some original tunes to show off my chops. These songs were written (mostly) @ National Academy of Songwriters workshops in Los Angeles. A great group of people and a great organization. Thanks for all the encouragement and support! These pop songs are about love, lust and obsession. You will hear influences from jazz, rock, blues and r&b; I hope you love them as much as I do.
