Trance/Rock/Chillout / Psy Trance / Rock Trance 9 MP3 Songs ELECTRONIC: Trance, EASY

LISTENING: Lounge Details: My music on Triple E is futuristic and anachronistic at a time. Anachronistic because it doesn't care at all about what's trendy, and futuristic because this combination of guitar and electronics is quite ahead of time. Actually this album had been planned as the second one of my Goa/psyTrance project "Eternal Bliss" (also here on CDBaby) but it turned more and more guitary and chilly. Additionally I became aware that I had always been hiding behind some group or project name. That's why Triple E can be looked at as my coming-out under my own name. This album is kind of a musical diary of the last few years. And it shows a broad spectrum of styles that interest me. About the artist: PJ Wassermann is a veteran of the international electronics scene, well known from Schaltkreis Wassermann (1980), Matterhorn Project (1985), Eternal Bliss (1995) and as a producer of Stella (2000) and other artists. PJ Wassermann is a composer, performer and producer. Additionally he develops software and likes to write articles for magazines, especially about Macintosh computers, and for his own website about topics like "The Star System", "The Cannabis Suppression", "60 Years of LSD" and other things that interest him (currently only in German, hopefully soon in English). And now some political stuff: End cannabis prohibition now! As a matter of fact it's not about drugs - it is a heavy and cruel political suppression of a certain lifestyle and way of thinking. Drug laws are abused for political repression. Use your right to vote and vote only for politicians who support legalisation. Smoke the vote!
