Sound has been an integral element in his artwork and in late 2004, he started recording musical compositions as The Painful Leg Injuries. His latest CD release entitled Backwards, Broken and Incorrectly is currently available through OKS Recordings of North America. On Backwards, Broken and Incorrectly, Byrne began by integrating the organic sound of his installation work with subtle abstract melodies inspired by Brian Eno and Christian Fennesz. Byrne boldly achieves his mission through constant experimentation and implementation of oddball techniques such as guitar played by knife, zither played with a slide, and manipulating feedback loops created by plugging analog effects processors into themselves. In his recording process, Byrne employs an ambitious array of instruments as varied as the theremin, melodica, synthesizer guitar, and steel drums. The result is a marriage of artistry and technology with as much in common with the electronic music pioneers of the 60's as his contemporaries. On this release Byrne creates a fractured, alien beauty with large haunting atmospherics and distinct, emergent melodies that evolve and shift, in effect lulling and challenging the listener at every turn. This CD-R release marks the first major release from a new label run by Byrne and his longtime collaborator, Jonah Goldstein, OKS Recordings of North America. OKSRNA will specialize in limited-run artist created CD-R releases that

create new and exciting directions for musical expression. Backwards, Broken and Incorrectly is currently available at New York's Other Music and directly through the artist by contacting him at painfulleginjuries@yahoo.com.
