Sykophunk: tight hip hop laced with hints of techno-gothic-industrial 21 MP3 Songs HIP HOP/RAP: Rap, HIP HOP/RAP: East Coast Details: D-O-E is the madman with a message behind a new sound called Sykophunk. His creative productions mix elements of gothic electronic music, laying it over hip hop beats that pound with full force, and then glueing it all together with passionate and intricate rhymes. His lyrics reflect the mood swings within his mind - from lashing out at the current state of the music industry to struggling with real life problems to invoking dark spirits for a human evolution to partying escaping it all, there's nothing that D-O-E is afraid to rap about. And he'll do it with raw energy and skillfull structure every time. After self-producing releasing demos since 1996, "Somewhere Between A Retard And A God" (released July 2004) is now available worldwide. This is the next big step in the rEvolution: Underground. D-O-E is already working on new material, and you can also catch him with his side projects: Domino Effect, Triple Vision, and Mother Prick of Misery. The Sykophunk does not rest, it only grows stronger. Check out these audio clips and you'll feel the power as well...
