An intelligent, dark and disarmingly intense new voice from Canada. 10 MP3 Songs POP: Folkly Pop, FOLK: Folk Pop Details: Ted "dr j" Jablonski is Calgary, Alberta, Canada's most famous performing artist-MD!! You may have seen him on T.V. or on big screen movies, heard him on national radio or seen him live on the theatrical/musical stage - but now this multi-instrumentalist, singer-songwriter has released his second independent CD. Produced by the award winning Tim Williams, "black cloud"'s 10 original songs feature piano, acoustic guitar, harmonica and the brooding baritone of "dr j". His writing is undeniably intelligent and somewhat quirky with an intimate, poetic lyrical style. "black cloud" explores themes as diverse as depression (title track), street people ("has heaven run out of miracles today?" recorded on Sept. 11, 2001), terminal illness ("hey sue") to lamenting the fate of professional hockey in Canada ("the night the rocket died") and the frivolous celebration of cigars ("havana is heaven").
