Alternative rock unique 10 MP3 Songs ROCK: Hard Rock, METAL: Alternative Metal Details: Nice is an Alternative hard rock band out of Provo Utah. The last three years have made Nice one of the tightest live acts around. With their choppy riffs and harmonizing vocals, this trio is hard to top for most four and five member bands of their genre. All songs are written and produced by the band, inspired by life's experiences and accidents. Nice is compared to such vocal harmonies as SevenDust, Puddle of Mud and Alice in Chains, and transforming bass riffs like tool to add back bone to the tight riffs on the Guitar. N I C E was formed in 2001. Their first single Sweet sweet got on the air on twenty different Radio stations before they decided to record a full album(single not on this album). However the singles surprising success convinced the band to press forward and record a full compilation called -Atrophy-. Music that had to be written and recorded no different than its performance live, so the songs were carefully analyzed and punctuated, leaving little or no room for error. The band's success has taken off from there and has convinced the members to continue their writing, touring, and recording.
