A haunting collection of melodies. This album takes the listener on a journey of belly licking madness and emotion filled sadness all in the simplicity of this silver disk. 11 MP3 Songs POP: Quirky, ELECTRONIC: Experimental Details: "If you believe that music should be about inspiration not imitation, if you think it should be about the process of creation, if you think it should be about how you sound not how you look then join me on my journey and we will make a change. These eleven tracks are all written from personal experience. These songs are about things I've been through and things I've done. I write because I HAVE to and if any of the above makes sense that you're likely to enjoy what I create." Some Reviews... IMG..... Excellent work. Very original sounding material. Great musicianship, instrumentation, orchestration and over all production values. Ryan has a strong personal vocal style that lends itself well to the material. I love the way this artist combines so many genres to create his unique sound. We have found this material to well written both musically and lyrically. Very poetic. FFVinyl.... by Martin Bowen... The songs have real potential and with the current revival in interest in 80's styles and music he could be picked up by a label. Very high camp pop with attitude and drama. BBCi..... Ryan offers something unique and interesting. It's nice to know there are people out there trying new things.
