Details: SinusFiction is a project of electronic musician Sies Kranen. After co-writing and producing tracks with his brother Ben for Diamond Crane, he is now working solo. The album "Relieved" is his first full album. "Relieved" shows were electronica meets dance and rock. It is produced with the love for electro sounds combined with guitars, piano's, vocals and plenty of blip-blops. The album includes the ludicrous hitsingle "iLove iPhone" which appeared on several blogs during the iPhone launch hype. The album starts with the track "Air Pollution" with a different look on this matter. On "Friends" the how-many-friends-do-you-have-on-facebook-hype is exposed. And "In Love With Lara" shows the virtual love for Tomb Raider character Lara Croft... Obviously, all songs don't take themself to serious. "Relieved" is a greatly produced electronic experience. Don't miss it.
