Adult contemporary Rock Pop music with great melodies and hooks, crying out loud for airplay on both sides of the Atlantic. 10 MP3 Songs POP: Today's Top 40, EASY LISTENING: Mood Music Details: When Supernatural, Peter Wolf (vocals, guitars) Thomas Kraemer (keys, bass, drums, computers) started to work on tracks and songs in 1993, which later led to their first album "The Calling", they really had no idea where the whole thing was going. Both, Peter and Thomas have been playing and touring with numerous Bands in Europe and the US over the past 15 years. Both are into sound scapes to visuals and appreciate their music being used in motion pictures and tv commercials. Due to being busy with touring and recording other projects, it took a while before their first Album "The Calling" was completed (released October 1998 Supernatural's second album "Bad Day" (released May 2005) marks the band's return to traditional song structures and commercial, yet sophisticated Pop and Rock tunes. Supernatural songs are a mixture of ambient atmospheres, catchy melodies and appealing hooks, crying out loud for airplay on both sides of the Atlantic. Supernatural is a global act. Peter Wolf is currently living in the U.S., Thomas Kraemer is living in Germany. Rather than letting this distance stand between them in their writing, recording and producing Supernatural's unique sound, the duo utilizes a broad network of musicians, production companies and support staff on both continents, in fact all over the world - whether recording or playing live. While tracks of "Bad Day" continue to get frequent airplay in the US, Europe, Australia and Japan, Supernatural have been writing and recording tracks for their next album "Never give up", coming to you in the near future.
