Indie Pop / Rock 3 MP3 Songs in this album (11:18) ! Related styles: POP: Britpop, ROCK: Garage Rock  
People who are interested in Radiohead Pixies Muse should consider this download. Details: Formed in January of 2007, The Monthlies are a Los Angeles Indie Rock outfit. Sometimes dark and loud, other times quite poppy and breezy. The Monthlies are always deeply melodic and memorable. The band has quickly earned a reputation for energetic live performances - partly because their singer (Wes O'lee) likes to make up lyrics on the spot and partly because of their female lead guitarist (Jana Bonderman) who gracefully works her pedal board in four-inch heels. Often drawing comparisons to Death Cab for Cutie, Muse, Pixies and The Plimsouls, early Monthlies recordings have already been featured on MTV2 News, and the Documentary, YOUNG WIDOW: Naked in the Memorial Playground. You'll even hear The Monthlies warming up (yes, warming up) in the upcoming Rock Band Video Game commercial! As they approach the completion of their debut full length self titled CD, their studio alter-ego seems to be just as formidable a presence as the live show.
