

Towards Intelligent Modeling: Statistical Approximation Theory

[DOWNLOAD HERE](#)

Introduction.- Statistical Approximation by Bivariate Picard Singular Integral Operators.- - Uniform Approximation in Statistical Sense by Bivariate Gauss-Weierstrass Singular Integral Operators.- - Statistical Lp-Convergence of Bivariate Smooth Picard Singular Integral Operators.- - Statistical Lp-Approximation by Bivariate Gauss-Weierstrass Singular Integral Operators.- - A Baskakov-Type Generalization of Statistical Approximation Theory.- - Weighted Approximation in Statistical Sense to Derivatives of Functions.- - Statistical Approximation to Periodic Functions by a General Family of Linear Operators.- - Relaxing the Positivity Condition of Linear Operators in Statistical Korovkin Theory.- - Statistical Approximation Theory for Stochastic Processes.- Statistical Approximation Theory for Multivariate Stochastic Processes. EAN/ISBN : 9783642198267 Publisher(s): Springer, Berlin Discussed keywords: Intelligente Systeme Format: ePub/PDF Author(s): Anastassiou, George A. - Duman, Oktay
