Cytology is fast becoming a hands-on diagnostic procedure for the veterinary practitioner. This new volume in the Self-Assessment Colour Reviews series contains 165 clinical cytological cases encountered in a variety of diagnostic situations. The cases are presented randomly, are illustrated by 267 photomicrographs in full-color, and appear as self-assessment questions and detailed explanatory answers. Species covered include mainly the dog and cat, with additional material on the horse. The book offers a sampling of cytological features and patterns as an aid to study, revision and continuing education for veterinarians in practice and training, for veterinary students, nurses and technicians.
