eavesdropping on the Divine consciousness! A sacred space of absolute peace and contentment ... represents all that is best about traditional New Age music." From the Artist I feel that the music on THE BEAUTY WITHIN communicates a deep, transcendent peace, as do the hundreds of people who have given me their feedback. Used as background, it creates a serene, calming ambience, and has even been proven to calm down hyperactive children and nervous pets! Used as foreground, it can be used either for deep relaxation or for inner meditative journeying. It is consistently peaceful throughout, ideal for meditation, yoga, massage, or any similar activity -- but remains musically interesting due to its lyrical melodies, unusual chord progressions and timbral variety. Each composition was lovingly crafted to uplift the spirit while still engaging the brain. This music flows from the beauty within me, with the hope that it will help awaken the beauty within you. About the Artist Benjamin Bernstein - now better-known as the acoustic singer/songwriter/guitarist BenJammin' (BJBmusic.com) --studied music at the University of Oklahoma, including composition training under Michael Hennagin (a student of Aaron Copland). Influenced by the meditation-based spiritual path he began following in 1979, Benjamin was drawn to electronic music as a means to express deep inner peace and expanded consciousness through music. The Beauty Within is the result.
