

## Mp3 Chris And Larry Gadler - Tracks

[DOWNLOAD HERE](#)

The music on this CD can best be described as Progressive Rock with a slight Country flavor and a little RB, Jazz and Do-Wop thrown in for good measure. Have fun. 10 MP3 Songs

**ROCK: Progressive Rock,**

**ROCK: 80's Rock Details:** Chris Gadler has been exposed to music in one form or another for a lifetime. His dad, Larry has been a Professional fulltime musician since the early sixties performing during the "Golden Years" of rock in the Seattle area giving Chris the opportunity to learn, grow and play music as a way of life. Larry grew tired of the Northwest and pursued his career in Nashville from 1979 to 1995. "I've done everything I ever set out to do, played all over Europe and parts of Africa, all over the US and Canada, appeared in music videos and on records and was on just about every Country TV show produced in the 80s and 90s from Hee Haw to Austin City Limits...." Since the late eighties early nineties and new Millennium Chris helped form many local bands in the Seattle area along with setting up and playing gigs along the west coast and mid west United States. In the mid 90's Larry moved to southern California and started his own recording studio working to create high quality recordings at reasonable prices using today's technology. With numerous recording sessions under their belts and a number of released CD's, Chris teamed with Larry and a group of talented musicians and singers to produce their debut CD, "TRACKS" recorded at Larry's RattleSnakeTracks Studio in Orange California. We created an album of music that we love. No particular style just plain music, from Rock to Country to a little R&B and Jazz. "I guess it's got a little something for everybody" Chris has said. We're going to get the players and singers together for a few shows and call the band "The Last Call Players". We hope you enjoy the songs and if we're in your neck of the woods, c'mon out and see us. - Chris and Larry Gadler -
