POP: Today's Top 40, ROCK: Hard Rock Details: Rock music is about to take on a new form with Jennifer Damere's album "Bellwether." The combination of her voice and Eric C. Pfeiffer's guitar escapades bring a new vibe to today's music. The music we make is straight up rock' n roll that brings together the great musicians of the past and is jump shot into the new millenium. Some may say it's a blend of old rock with new technology. It's not 80s music-just seems that way to some people because we actually play our instruments. Jennifer and her band mates all hold the same philosophy...to study, to practice, and work as hard as needed to sound great onstage and in the studio. Much effort goes into song arrangement and all the details that are needed to make a song solid as well as make a show solid. You're not going to see a group of people onstage that look like most other bands--like they just got out of bed and wearing the same clothes they slept in. Oh no, this band believes that fans come to see a show and expect a show. The fans pay to be entertained, not to watch a bunch of guys in dirty T-shirts. Every detail of the journey that begins with the concept of a new song...to the final set list...to the overall stage presence is just as important as the other. Jennifer Damere is a music woman for today with the rock'n soul of yesterday. Her music intertwines present day trends with influences of rock, punk, and R&B of the past. She's a dichotomy of emotion and drive that inspires all generations. Her success comes from blending driving, rockin' new songs, on-stage showmanship, and giving her fans what they want. Backed by a team of experienced and talented musicians, she and her band have a trademark and talent that not many bands of today can claim. Jennifer is all about a rock'n roll attitude and bringing the life back into the genre. She's a high-energy musician who inspires people to get up and have a good time. Eric C. Pfeiffer Eric comes from a long history of guitar and rock music yet has a style all his own. His technique

stands out above today's guitar players. From shredding to pounding rhythms and to melodies, Eric's guitar work is unique to rock music. It encompasses all genres, flavors, and sounds which has molded a sound unlike any other. His song writing and arrangement knowledge brings life, texture, and an energetic dynamic to his music.
