Fresh takes and original arrangements of Bob Dylan songs in a mostly acoustic full band setting. 11 MP3 Songs ROCK: Folk Rock, FOLK: Power-folk Details: This album got radio airplay on over 100 radio stations across the US and Canada. The sound is pure: vintage acoustic guitars, bass, drums, piano and organ. The idea was to come up with fresh but unforced arrangements of Dylan material- not radical departures or straight copies. We chose some obscure material and a few songs that are relatively well known but none that were hits or singles. This project was done out of love for the songs and the desire to bring something fresh to them. Our aim was to make an album that would flow and be easy on the ears. We are really a rock and roll band first and foremost so the album has a solid rock feel even though almost all the guitar parts are played on acoustics. Our new album of original songs should be released late 2002 or early 2003. You can read more about us on our website: freethemusic.net
