Mp3 Rob J - The Ep

DOWNLOAD HERE

He may sound familiar to you but you won't know why. Pop has never sounded so meaningful. 6 MP3 Songs POP: Today's Top 40, POP: New Wave Details: Rob was born in Harrow, North London on a hot summers day, July 4th. As a child he displayed an extroverted personality and was a very happy child. He grew up with two older sisters and a poodle that didn't like him. Although this was a dilemma for his parents, Rob got the benefit of the doubt and the poodle went to a happy home. Not so academically inclined at school, Rob began singing at age 7 and after going to art college he thought his future was on the stage. He joined a drama workshop in his teens and soon shone in various theatre plays. Rob's big break came on the hit video game show Gamesworld on SKY TV where he played the role of Videator Electric Eddie. He soon realized, though, that acting was not his destiny and so he decided to embark on the career path that would bring us to where we are today. Rob began his music career on the club circuit, singing and getting used to the live crowd. He knew he had the voice but was disheartened as he felt he couldn't pen lyrics. After some interesting life experience and seeing more of the world as he gigged and worked with producers in Los Angeles, the lyrics and melodies finally came through. Rob met producer Keefe West, Jr. in early 2000. Keefe is an accomplished producer/musician from Sydney, Australia who has had record deals with Sony and toured with artists such as Annie Lennox, Peter Gabriel and Joi. Keefe saw great potential in Rob and their relationship as friends and musicians helped shape Rob's unique musical style. Presently Rob and Keefe have recorded over 18 tracks. Rob writes all his own songs, transferring his penned lyrics into melodies very quickly. Keefe then blends his many live guitars and beats into the track. This creates the raw style that makes Rob J. Nathan stand out as one of the freshest singer/songwriters to emerge in many a year. The EP of 6 tracks is availabe now!
