A rarity in the chill-out genre - an album with the depth to entertain your imagination, yet the simplicity not to distract. No pretense, no demands, and no words. Just beautiful music. 8 MP3 Songs ELECTRONIC: Chill out, EASY LISTENING: Lounge Show all album songs: S Songs Details: Composed and produced on a beautiful island in the Hauraki Gulf, in a home studio nestled in the wild New Zealand bush, this CD - simply titled "S" - is Unbreakable Foundations public debut. It is an album of deep, inspiring instrumental music, drawing all of the composers extensive musical influences, aspirations and experiences into a single coherent statement. It meshes electronic and acoustic elements intelligently and fluently, whilst providing a natural and accessible combination of complexity with simplicity. It traverses a kaleidoscope of moods, yet maintains a clear and intuitive direction. Ultimately, it offers the rare quality of being either entirely engaging evocative, or completely supportive and ambient, depending on the focus of the listener. The man behind Unbreakable Foundation, Anthony Milas, has been creating music obsessively for more than half his life. Few of his works have been published, and he has developed his skills almost entirely in private, without tuition or training. He cannot read music, performs rarely, and has a back-catalogue of 6-7 albums-worth of completed recordings. Perhaps ours is not to wonder why, perhaps ours is simply to say ... S?
