Well-rounded Jazz Fusion with a touch of World sound and some electronic production. 10 MP3 Songs EASY LISTENING: Lounge, JAZZ: Jazz Fusion Details: This CD is the second release from Refusion Project. Originally titled "Something Beijing", the entire release was scrapped and re-worked last year. We bring to the table a solid line up of acoustic instruments set against a backdrop of analog synths and beatboxes in a CD that's sure to please. If you like Jazz Lounge of any kind, then you'll certainly want this CD as part of your collection. Does anyone remember the days when you got REALLY cool prizes inside every box of Cracker Jacks? I do, and in that vein, every copy of 'City Life' contains a way awesome special little prize as a 'Thank You' for buying my CD. It's something you can only get in China. If that doesn't tempt you to buy my new CD, besides the fact that the music is pretty cool, then I don't know what would. Cheers from Shanghai, Jon
