A sort of spacey Moby meets an electro-edged Depeche Mode; but really they are love songs. 12 MP3 Songs ELECTRONIC: Pop Crossover, ELECTRONIC: Electronica Show all album songs: Unsung Songs Details: This is the debut album for Rob-Ryan. It is the result of collaboration with talented musician friends, who allowed me to come and play at their place to develop many of the songs. Most of the lyrics were written in Zrich or in Athens, where crazy, fun nights were spent getting these songs off the ground. "Unsung" was arranged and programmed by Kevin Kehoe, and mastered by Don Bartley at Studios 301, Sydney.
