This is mostly easy listening, chill out cosmic rock and roll music, baby. 6 MP3 Songs EASY LISTENING: Mood Music, BLUES: Mellow Blues Details: My name is Sergio, but you can call me Serg. I'm a traveller of both time and space, as well as a music fan, and a guitarist and home recording artist. My album 'Ultraviolet Sun' features over 50 minutes of original material. The vibe is mostly mellow, laid back and easy listening in a variety of styles ... a mix of rock, blues, folk, new age, psychedelic tribal fusion, and progressive metal. There are a variety of voices, sounds, and instruments featured on this disc. Beyond the usual guitar, bass, and drums ... there is also piano, harmonica, sitar, tabla, horns, flute, didgeridoo, string arrangements, and various sound fx. Worth a mention is the epic 6th song called 'Shamans Vision', weighing in at about 35 minutes ... its like an extended EP within an album. Shamans Vision is a unique journey through space and time which will open doors in your mind, and take you to exotic places far, far away.
