Unstoppable Product Creation The fastest and easiest way to start your own Niche Empires ! And generate multiple income streams in minutes! Discover How You Can Create Hundreds Of New Automatic Set And Forget Profit Streams By Exploiting The Most Lucrative Niche Markets Within Minutes! Heres Just A Few Ways You Can Profit With The Niche Empires Pack... Create New Unique Niche Packages - Just group together six or eight products on the same theme, for example Blogging. Give your new package a name such as Blogging For Beginners and then sell it for \$27 with no rights, \$37 with resell rights, \$47 with Master Resell Rights, and \$67 with Private Label Rights. When youve done that, move onto the next niche. You can quite easily setup 10 new packages/profit streams from the Niche Empires Package without really thinking about it. If you ONLY sold one product per day out of all your 10 profit streams (for arguments sake the \$37 product), you would generate $\$37 \times 30$ which is \$1110 per month. Create Niche Membership Sites - This is my personal favorite. Heres how I do it. Create a membership site about say Health and Fitness, and add five or six relevant products from the Core Niche Module every month. Charging a monthly membership fee of only \$9.95 and with just 50 members, youll have a passive monthly income of \$497. Repeat this process another 5 times with different niches (eg. Cooking, Diets, Weight Loss, Self-Improvement, Personal Finance) and with just 50 members per niche membership site, youve just generated an ADDITIONAL \$2485 on top of your first site. These figures are based on ONLY 50 members per site. If you actively promoted your membership sites, it would be fairly

easy to achieve membership levels of between 700 and 800 members per site. Do the Math. Why do you think all the smart marketers are setting up membership sites? Its a real no brainer. Cross Promotion - If you decided to create niche membership sites say in Cooking, Diets, and Weight Loss as above, and you have 50 members per membership site, heres something else you can do... Email your Cooking and Diets members about your Weight Loss membership site, then email your Cooking and Weight Loss members about your Diet membership site, and finally email your Weight Loss and Diet members about your Cooking membership site. If only 16 take up your offer youve just made an extra $(16/100) \times 150 \times \9.95 which is \$238 per month just by sending 3 emails. Create Brand New Products - By editing the Private Label Products youll be able to create your own brand new unique products. Just think, youll have a product to sell that no one else is selling. That means no competition - and youll be able to name your own price, as well as choosing whether to include private, master, resale or no rights with your product. When youve created your unique product, prepare a short report about it (4 or 5 pages maximum), and give away the report. These type of reports spread virally, and before you know it youll have a stampede on your hands. This is exactly the method that I use (all the big shot marketers also use it). It never fails. Select A Niche From The Article Master Series Packs - I did this one about 2 months ago. Well select Credit Cards and Debt (Vol #3) which has 50 articles. Now, using a website template from the Graphics Module (see below) create your 50 page website and main page by copying and pasting the articles, add your Google AdSense code to each page, go to ClickBank and add a couple of related products with your affiliate link embedded. Dont forget to add a popup form on the main page giving away a free report or product, the form should feed your autoresponder so that you can build a niche specific list. It should take you 2 to 3 days at the most to put this website together. Youve got 2 choices now: You can add it as a subdirectory or sub domain to your main website, or even get a new domain for it (\$7.95) and use it to generate a recurring income for yourself through AdSense clicks and affiliate commissions from product sales through ClickBank. Purchase a related domain name, a years hosting, and upload the website and sell EVERYTHING (including domain and hosting) as a package through Ebay. A 50 page website about Credit Cards and Debt will sell on Ebay for \$600 to \$800. Obviously it depends on the niche that you choose. For some niches youll get considerably more than that, and for others less. Thats why its important to choose a profitable niche. By building just one website per week and selling it, youre looking at \$2400 to \$3200 per month. As I said before, it should take you 2 to 3 days to build, and with a bit of

practice even less time.
