Advances In Intelligent Systems

[DOWNLOAD HERE](#)

From the contents: From the content: Performance Analysis of Virtual Force Models in Node Deployment Algorithm of WSN.- Design of WEB Video Monitoring Center Server.- An Artificial Intelligence Central Air-conditioning Controller.- Application of GMDH to Short-term Load Forecasting.- Recognition of Control Chart Patterns Using Decision Tree of Multi-class SVM.- Robust Adaptive Neural Network Control for Nonlinear Time-delay Systems.- The Analysis of Thermal Field and Thermal Deformation of a Water-cooling Radiator by Finite Element Simulation.- Incremental Mining Algorithm of Sequential Patterns Based on Sequence Tree. EAN/ISBN : 9783642278693 Publisher(s): Springer, Berlin Format: ePub/PDF Author(s): Lee, Gary
