Pagan/Wiccan band. Mysteries of the Old Religion now retold in song. 15 MP3 Songs WORLD: Celtic, FOLK: Traditional Folk Details: Long before the movie "Moonstruck" starring Cher appeared in theaters, a band called Moonstruck was born. When Moonstruck started out in the early 80's, playing music at Sabbats and different gatherings, there were very few songs dedicated to the God and Goddess. So we began writing and collecting songs. As the New Age movement grew, we were finally able to come out of the closet and record our first tape, called Moonstruck. With this tape, we began a series of recordings dedicated to the God and Goddess and all beings of love and light. Our songs found a home in all earth religions and many of the songs became classics. In September of 1999, we released a new CD called, "Witch of the Wildwoods". Our music speaks of the mysteries of the Old Religion that was taught to us in times past and now retold in song. We call them tunes of magical folklore. This exciting mix of vocals, chants and instrumentals is sure to uplift and inspire you.
