

# Mp3 Riverdale - These Beautiful Things

[DOWNLOAD HERE](#)

Powerful music written with a passion for God. Riverdale's Lyrics and Beats always keep you on your toes. 6 MP3 Songs POP: Power Pop, ROCK: Rockabilly Details: Riverdale is a Indie/Rock/Power-pop band from South GA, a place that has spawned bands with the likes of Forever Changed, Chasing Victory and From First to Last. Though we have been playing music collectively and separate for close to 7 years, we have, just in the past year, changed our member lineup and genre. Also in the past year we have built a fan base in North Georgia and Florida by playing in towns such as Atlanta, Dahlonega, Acworth, Jacksonville, Titusville (Orlando area) and Tampa Bay. With our 8-track indie release "My First Love," we plan to extend our fan base outside of Georgia and Florida and into North and South Carolina, Alabama and Tennessee by way of shows, radio and the internet. With all members working together as one to create a unique sound, the four members contribute different influences to the band. Josh Wilsons (lead vocals and guitar) catchy melodies remind some of Fall Out Boy or Maroon 5. While Jason Stones (bass and backup vocals) bass lines lead like Flea of the Red Hot Chili Peppers minus the funk. The energetic and creative drum beats of Randy Harrell sometimes are compared to Jimmy Eat World or Forever Changed. With the addition of Matt Wilson, Josh's little brother, awww, i know it's cute. Riverdale has become complete. He really knows how to fill the gaps with sweet leads and amazing Backup vocals. Our energetic live show backed up by our fresh and creative song-writing, brings a breath of fresh air to all of those who are tired of the endless ocean of mainstream. Our music is packed with interesting vocal harmonies, bass riffs that lead instead of follow, and melodies that you'll sing days after a show. As new investments are fueled by new opportunities, we continue to strive to make our mark in the underground music world with hopes of one day being the next big thing.
