Warning! While The Internet Marketing Niche Is Becoming More & More Crowded Every Ticking Minute, So Are Your Chances Of Succeeding Online! Read On To Learn How You Can Still Make It BIG Time Online By Tapping Into Super HOT Niches With Super Less Competition! Dear Aspiring Internet Marketer, As you are reading this letter, product brands are now competing for shelf space with their retailers such as Wal-Mart, Tesco, Giant, and Carrefour.' So what has this got to do with you? In two words: A LOT. Before we jump into the Internet Marketing context, let me explain. Did you notice that retailers and chain stores are now slowly producing products of their own in the offline world? Perhaps you did. Or maybe you weren't aware. It's okay even if you didn't realize this change, as I'm about to reveal it to you. And when this happens, it won't come as any surprise that many a product brand are now competing for shelf space even with their retailers. Now here's the kicker: the retailers obtain the Private Label to some physical goods, simply brand them as their own or label under their store logo, and push them into the marketplace - thus offering another option to the consumers! And regardless of whichever

brand or product the consumer chooses, the retailers win. If the consumers lean more towards the store brands (which were formerly private labeled), it would spell tough competition for retailers.
