

Husqvarna Prisma 990 ,945 - 990 Service Manual

Directions for use

These service instructions are intended to be used by service workshop personnel, or by salesmen who carry out servicing in their own districts. They assume a thorough knowledge of the handling of precision appliances and accessibility to service tools.

The manual is divided into three sections and covers all service operations and checks which should be carried out when making a complete overhaul of a sewing machine.

The first section covers the control of the adequate functioning of integral details.

The second section deals with the various settings which must be maintained to ensure that the machine functions satisfactorily.

The third section covers dismantling and mounting instructions.

The diagrams only give an indication as to where the detail or mechanism mentioned is located in the machine. For more detailed information regarding the construction, etc., refer to the diagrams in the spare parts list.

Contents	Page
Visual control of details	8
Setting instructions	9-31
Dismantling and mounting instructions	32-40

The following details should be visually checked:

	See page
Stitch plate	3
Presserfoot	3
