

Mp3 Michael Oliva - Modern Love

[DOWNLOAD HERE](#)

A solo artist hailing from Cincinnati, Michael Oliva draws influences from bands such as the Strokes and the Clash, providing the listener with a wide variety of sounds and a massive influx of energy. 13 MP3 Songs POP: Beatles-pop, ROCK: Grunge Details: Born out of the tangled and twisted cable covered floor of Michael Olivas basement studio, Modern Love is a collection of narratives reflecting the life of Michael Oliva and those around him through his point of view. The songs are basic, good old pop music at its core, covered in an indie rock coated shell sprinkled with hooks as addicting as crack cocaine. Michael wrote all the music and lyrics to every song on the album, and recorded them on Pro Tools one track at a time. Besides playing all the instruments on the album (except bass on Girl, played by Alex Stenard, the bassist in Mikes band The Halequins) Michael mixed and produced the CD in Pro Tools as well as contributed to the art work and CDs layout. The songs on Modern Love consist of dark, satirical and abstract ideas and perceptions of life and talk about things any 21 year old can relate to. Except instead of delivering them in the tired old clichs and predictable song structures that modern pop/rock are so common for these days, Michael Oliva takes a creative twist on everyday life and says normal things in a very unique, not so normal, way. Some of the songs on this album were written and recorded in a matter of days, sometimes hours and some are the final product of several revisions and re-writes of songs-in-the-making that were accomplished over the course of two years. Give Michael a listen and do your part in supporting the music of the future! Buy this CD and redeem your faith in the power of underground rock n roll! Pop music done right is a rare thing in this day and age, come see how its done!

- I just listened to the new CD...its awesome. Keep it up rockstar! - Wowie wow your album...is...amazing!

- Your new album is sexy. - Your new CD is orgasmic! - I love the new song and I love your voice!
