

Mp3 Pi - Beat Mining In Dark Places

[DOWNLOAD HERE](#)

Urban-pop and folk-hop. 11 MP3 Songs POP: California Pop, URBAN/R&B: R&B Pop Crossover Details: When you listen to beat mining in dark places, you are really listening to Pi. Every sound, nuance, and word on this cd was born of her own creation. After working in several collaborative situations, Pi finally felt ready to tackle the whole enchilada - and with her usual 'can do' gusto set out to tackle protocols and multi-instrumentalism with gusto. It was an unusually difficult birth- not only was Pi learning recording and production, but in the middle of the record she got blindsided by a serious illness called ITP. (See below for more information on ITP). Most of 2004, Pi spent in and out of the hospital, and when she felt well, working on this record. As a result, beat mining in dark places, juxtaposes serious life questions, and a 'girls just gotta have fun' attitude, with Pi's trademark urban -pop -folk-hop sound. The result is perhaps best summed up by one of Pi's fans: "Thanks for the performance and great lyrics. I read about your ITP. My wife died of breast cancer in Jan so I have also seen the inside of cancer wards. They are places of heartbreaking despair, wacky optimism and bizarre humor and it shows in your music. Please keep on performing and recording. Music that touches the soul is often tempered by hard times and pain. - Rod, UK. Get this record, its fun and real all at once, from Pi's heart right to yours. *ITP Stands for Idiopathic Thrombocytopenic Purpura ITP is a rare autoimmune disease, wherein the body begins to attack its own blood platelets, making the patient unable to clot, and therefore susceptible to internal or external bleeding. While ITP is fatal only 3 of the time, there is no known cure for it. Portions of the sale of this CD are donated to the Platelet Disorder Support Association- for more info, visit PDSA.org
