Seductive trance; ambient meditative sonic journey influenced by the instruments, texture, landscape and culture of the indigenous tribes and peoples of the world. 13 MP3 Songs NEW AGE: Meditation, NEW AGE: Healing Details: Shinobi is an ambient meditative sonic journey influenced by the instruments, texture, landscape and culture of the indigenous tribes and peoples of the world. Immersion is an inward path, music to assist the meditative state and create the sacred space necessary for quiet moments and thought to listen to your own still voice. Shinobi blurred into being late in 2003. MKS, a Ninjutsu practitioner and member of the Bujinkan found almost what was necessary to create and sustain the near dream meditative state in the music of Jonathan Goldman and Steve Roach. It was in seeking a deeper trance that Shinobi (Stealer In) was created. Drawing from global ethnic vocal expression, rhythm and chant, Shinobi brings it together creating synchronic sound for meditative trance. The cover art for Shinobi Immersion was created by Ronin Studios. The Model, the Dark Goddess of Shinobi is Maragarita and can be reached for photography concept and session at MargaritaGarcia.com. Maragarita's photographer for the album work was Morgan Ashley Inc - FLA.
