SEO Keyword Article Management System - This is one of our "secret weapons". Remember that all your content is unique and fresh, created just for your site... then watch what happens each time a visitor (or search engine) comes to your site! The software allows you to specify what article you want shown for a specific keyword phrase. In the past, you were forced to use an article rotator on your site if you had more keywords than articles. Now you can specify a specific article per keyword or let the script randomly display an article. As you add more articles, you can easily assign them to new keyword phrases. SEO Friendly RSS Feeds - You've heard all the buzz about RSS, right? This is a whole new channel for your information, and the custom RSS script we've created (you can't get this anywhere else) creates RSS news feeds that the search engines will love. All you do is choose the keywords and the source of the feed, and the script does the rest. Affiliate Product Placement - Place Amazon products, Clickbank Products, and even your own products on your content site quickly and easily. You just update one file - your affiliate products show on every page of the site. You can change your products anytime you want, and it's quick and simple to do. Easy Push-Button Updates - We've made it quick and easy to update your site with a few keystrokes. You can change all your articles, navigation elements, footer, and affiliate products by just inputting the new data. Then the changes take place automatically across your entire site! add new affiliate products - it's easy as "1-2-3". Add New Rotating Content With Ease - If you want to keep your site growing, you must keep adding content. We make it easy to take your new articles, save them to the articles folder, and "bam!" - you have new content that starts rotating instantly.
