

Micromanufacturing

[DOWNLOAD HERE](#)

Foreword; Table of Contents; List of Figures; List of Tables; Executive Summary; - 1. Introduction: Richard E. DeVor and Kornel F. Ehmann: Background and Scope; - Methodology; Overview of the Report; Format for this Report; Acknowledgements; - 2. Design: Martin L. Culpepper and Thomas R. Kurfess; Abstract; The Approach Taken to Assess the State-of-the-Art in NLBMM Design; Unique Requirements for the Design of NLBMM Parts, Processes and Equipment; The Design Process and the Important Elements of Design of Y for NLBMM Products; The State-of-the-Art and Gaps between Existing and Required Capabilities; Summary and Conclusions; References; 3. Materials: - David Bourell and Kamlakar Rajurkar: Abstract; Materials for Micromanufacturing; - Materials Issues in Micromanufacturing; Summary and Conclusions; References; - 4. Processes: Kamlakar Rajurkar and Marc Madou: Abstract; Micromanufacturing Processes and Equipment; Micromanufacturing Issues; Summary and Conclusions; - References; 5. Metrology, Sensors and Control: Thomas R. Kurfess and Thom J. Hodgson: Abstract; Introduction; Summary and Conclusions; References; 6. Non-lithography Applications: Marc Madou: Abstract; Applications of Non-lithography Machining; Flexible Manufacturing and Desktop Manufacturing; MEMS Foundry; - Summary; References; 7. Business, Education, the Environment, and Other Issues: - Thom J. Hodgson: Abstract ; Business; Education; Environment; Government Policies; - APPENDICES : A. Panelist Biographies; B. Questionnaire for Site Visits; - C. Site Reports Asia: National Institute of Advanced Industrial Science and Technology (AIST); Asia Pacific Microsystems, Inc. (APM); FANUC, FA - Hitachi Chemical R&D Center in Tsukuba; ITRI Mechanical Industry Research Laboratories (MIRL); ITRI Nano Technology Research Center (NTRC); - Instrument Technology Research Center (ITRC); Korean Advanced Institute of Science and Technology (KAIST); Korean Institute of Machinery and Materials (KJMM); Kyocera Corporation; Kyoto University; Matsuura Machinery Corporation; Metal Industries Research and Development Centre (MTRDC); Mitsubishi Electric Corporation (MEC); Nagoya University Center for Cooperative Research in Advanced Science; Nagoya University Laboratory of Structure and Morphology Control; Nagoya University Department of Micro System Engineering; National Cheng Kung University; National Science Council; National Taiwan University; Olympus Corporate R&D

Center; RIKEN (The Institute of Physical & Chemical Research); Samsung Electro Mechanics Corp., R&D Center; - Sankyo Seiki; Sansyu Finetool Co., Ltd; Seiko Instruments Inc. (511); Seoul National University; University of Electro Communications; University of Tokyo; I. I. S., The University of Tokyo;Yonsei University ; D. Site Reports Europe: BASELWORLD;- Robert Bosch, GmbH; Ecole Polytechnique Federale De Lausanne (EPFL);- Fraunhofer Institute Manufacturing Engineering and Automation (IPA); - Fraunhofer Institute Production Systems and Design Technology (IPK);- Fraunhofer Institute Production and Laser Technology (IPT)/(ILT); Fraunhofer Institute Reliability and Microintegration (IZM); Karlsruhe Research Center; Kiocke Nanotechnik; Kugler GmbH; Laser Zentrum Hannover e.V; Institut für Mikrotechnik Mainz GmbH (1MM); Philips Center for Industrial Technology (CFT); Swiss Federal Institute of Technology Zurich (ETHZ); Technical University of Eindhoven ; Carl Zeiss Industrielle Messtechnik, GmbH; Zumtobel;E. Glossary. EAN/ISBN : 9781402059490 Publisher(s): Springer Netherlands Format: ePub/PDF Author(s): Ehmman, Kornel F. - Bourell, David - Culpepper, Martin L.
