"Very weird songs. I love them!" (myspace.com) "Haha whata mean band cheers to ever introduced me to them...Techno and rock - mint" (ilike.com) "Saludos!! - Muy buena musicaa!!" (myspace.com) Mr. Nuclear - "Thx Daryl, this rules!" (ilike.com) Mr. Nuclear - "holy crap i never knew i liked this stuff! Mr Nuclear is my best friend, now." (facebook.com) Mr. Nuclear - "Excellent track, Very original - Wow, right off the bat this is definitely one of the most original tracks Ive heard. I find this to be very catchy, with many unique sounds meshing together very well, and the vocoder works well also. The bass sound fits very well also, envelope filter perfectly programmed (unless its a loop)The arrangement is very nice, the breaks come at the right time and are lead into and out very skillfully. The short length serves this song well as to not overdo a good thing. This artist needs a contract." This is well-composed, well-arranged and well-mixed. You clearly know what you're doing here, and are quite talented. The sounds also show the amount of work put into creating them. The mood is both uplifting and suspensful, and the melody does a good job of supporting that. This song is not only super well-done, but the kind of music I really like. Fantastic, smashing job! Good swelling bassline. I like this track and it would grab my interest if i heard it on a compilation. The drums sounds sound original, are they? overall an original sounding track, I like it. Grungy and industrial, atmosheric. A well produced
