By age 6, he began to show his musical interests and was singing in his church choir. In high school Jarrod competed in almost every talent show, at times in two different acts, one singing the other dancing. Voted "Most Talented" by his peers, at the young age of 17 Jarrod joined the singing group "5 Syde" and was signed to a management deal. After recording their single "Your Love" and performing around the Twin Cities, the group disbanded leaving Jarrod ready and motivated to start is solo career. Jarrod has also studied dance and is a talented choreographer, scoring numerous gigs for local artists such as; Veronica and the Mpls Band, Jana Anderson, Rupert's Orchestra and "Music Icon", Prince. Seeing those performers fueled his hunger to step out of the background and become the star he was meant to be! As an experienced songwriter Jarrod has successfully written all of the tracks on his debut CD. The title track pays homage to his mother who passed away while in the midst of recording. This song is sure to touch the hearts around the world with the deeply emotional and personal lyrics. Jarrod enlisted the help of hot Producer Tori Fixx for funky, danceable collaborations such as "Do You Wanna?", "No Turnin' Back" and "Keep on Fighting". Jarrod's lyrics are thought provoking and many times provocative as he deals with such issues

as the loss of his friends and family due to suicide, sickle cell, cancer and HIV and his personal struggle with weight. He blasts his detractors by proclaiming "No matter what you may say, I'm not goin' let you break me, I may be down but I'm goin' keep on fighting". If Jarrod's history is any indication of his future success the lyrics of his song "No Turnin' Back" in which Jarrod boldly states, "I been listenin' to you, but y'all all sound the same, by the time this song is through, you'll be sayin' my name". Is certain to be a sign of things to come.
