Combines elements of the best trip-hop, ambient soundscapes fused with a rock format. 2WR will open your mind and take you on a long strange trip with or without the drugs. 10 MP3 Songs ELECTRONIC: Soundscapes, ELECTRONIC: Trip Hop Details: PERSEVERANCE. COURAGE. SPIRITUALITY. CREATIVITY. 2WR was formed in 2001 with all this in mind. After years at making a name for themselves in the hardcore rock scene with Shaft, Sakajaweeda, Ringworm, and Sour Jane, singer/guitarist Tony Prat and drummer/keyboardist/studio engineer Jon Farmer decided that enough was enough. Formula was taboo. Everything from the past - meaningless. It was time to make the music that the two heard in their dreams - a style not totally comprehended until the completion of their new full length record The Drums Talk to Me. The duo performs their unique blend of trip-hop and rock live with an energy and power that only years of playing heavy music could develop. Self-produced and recorded by Jon Farmer, the album is thick with textures and moods; Jacksonville's quintessential frontman Tony Prat adds the life and lyrical depth that only he can. The album is due for release this fall through DRP Records, the independent stronghold committed to spreading the message of 2WR. Together we stand. Together we're strong. THIS IS OUR RANTHEM.
