contained in this service manual has been prepared for the professional automotive technician involved in
daily repair operations. Information in this manual is divided into groups. These groups contain : general
information, diagnosis, testing, adjustments, removal, installation, disassembly, and assembly procedures
for the systems and components. To assist in locating a group title page, use the Group Tab Locator on
the following page. The solid bar after the group title is aligned to a solid tab on the first page of each
group. The first page of the group has a contents section that lists major topics within the group. If you are
not sure which Group contains the information you need, look up the Component/System in the
alphabetical index located in the rear of this manual. Tightening torques are provided as a specific value
throughout this manual. This value represents the midpoint of the acceptable engineering torque range
for a given fastener application. These torque values are intended for use in service assembly and
installation procedures using the correct OEM fasteners. When replacing fasteners, always use the same
type (part number) fastener as removed. CONTENTS GROUP TAB LOCATOR Introduction 0 Lubrication
