

International Financial Governance Under Stress

[DOWNLOAD HERE](#)

Wide-ranging analysis of institutional reforms needed to cope with international financial crises. Persistent episodes of global financial crises have placed the existing system of international monetary and financial governance under stress. The resulting economic turmoil provides a focal point for rethinking the norms and institutions of global financial architecture and the policy options of public and private authorities at national, regional and transnational levels. This volume moves beyond analysis of the causes and consequences of recent financial crises and concentrates on issues of policy. Written by distinguished scholars, it focuses on the tension between global market structures and national policy imperatives. Accessible to both specialists and general readers, the analysis is coherent across a broad range of theoretical and empirical cases. Offering a series of reasoned policy responses to financial integration and crises, the volume grapples directly with the institutional and often-neglected normative dimensions of international financial architecture. The volume thus constitutes required reading for scholars and policy-makers. EAN/ISBN : 9780511030611 Publisher(s): Cambridge University Press Format: ePub/PDF Author(s): Underhill, Geoffrey R. D. - Zhang, Xiaoke
