He moved to the U.S. with his newly adopted family in 1972 where he began his musical studies in piano which continued for 13 years, and then higher studies for an additional 4 years. Composing his first minuet at the age of 6, he knew why he was alive. The adoption was the best thing that happened to him. It gave him the chance to do the otherwise impossible, to follow his dreams. At the age of 18 he attended Full Sail center for the recording arts and graduated in 1989. About 3 months later he left for Germany. There he explored and knocked on doors, but none opened. Then on a cold and wintry day one door did open. A composer by the name of Erik Ohl gave him an engineering job in his recording studio (Frankfurt, Germany). There he worked as a mastering engineer for Mr. Ohl for very little pay, but at night he could use the studio to work on his own compositions. It was a very inspirational year for him being that he could witness the fall of the Berlin wall and many other changes in the region. He eventually mastered 8 albums in a 2-year period and then moved back to the U.S. Erik Ohl has become a many-time Golden Bambi award nominee. (German Grammy).
