Beatles-pop with a twist. 10 MP3 Songs POP: Power Pop, POP: Beatles-pop Details: This is the 5th and probably the very best release by veteran singer song writer and multi insrumentalist, Saul Zonana. This CD/DVD includes a short film featuring Saul, about todays music buisness and includes many world class musicians. The CD features 10 new tunes and everyone of them is a pop gem (which is actually typical of Saul's CD's). "I consider this my most musical collection to date" says Saul. He's right. The guitars really stand out on this one. Especially on numbers like "Like anyone Would" a song about an odd experience with a Bug that landed on Saul's windshield while driving home. Although the disc features great musicians such as Gerry Leonard (David Bowie, Duncan Shiek) and Aaron Comess(Spin Doctors), Saul plays the bulk of the instruments himself on this collection. Another great one is "Broken Home" which tells the story of a once loving family that begins to fall apart. The melodies are unforgettable and the instrumentation rivals any of your favorite classic rock bands. "I really hear all of my classic rock influences raging out on these tunes" Saul laughs. I strongly suggest grabbing this one and getting into the sites on the DVD and the sounds on the CD. Indie Pop Mag gives this 5 out of 5 stars!
