

Mp3 Minan - Have You Ever

[DOWNLOAD HERE](#)

Heavenly, wonderful, atmospheric, analog/digital electronic synth pop with ambient sounds that will have you thinking you must be listening to... 11 MP3 Songs ELECTRONIC: Pop Crossover, ROCK: Progressive Rock Details: . Here's what some have had to say about Minan's recordings so far: "Bloody Fantastic! I've listened to a lot of electronically produced) synth pop and NONE can generate such beautiful and atmospheric sounds as this awesome feast!! Who needs BJORK or ENYA and the same old cliched sound sets they use when you can have this....! "Chaser of The Wind"...breathtaking! At last, 'new age' pop with a punch where it counts. More please....." - Adam Longfellow, USA "One word describes "Have You Ever" and "Rainbows" - Heavenly!! Wonderful, atmospheric, and most importantly, inspiring, very inspiring. Analog is fine, but there are just so many analog recordings around. It's refreshing to come across something so different. I'm going to recommend this to anyone who'll listen!!" And, oh yeah, I'm going to go back very soon and buy the damn thing myself...after all, if the downloaded demo clips are this good, what about the whole uncensored unrestricted version?- Mike Dobson, UK "This is the only recording that could make the ambient sounds that please and satisfy my craving for something memorable, positive, bright, even uplifting... a recording that actually sounds good, so if these album (Rainbows and Have You Ever) work for me and inspires me in my own recorded tracks, think of what it can do for you, the average listener who must surely be as sick and tired of the mainstream as I am... I give this one a , two thumbs up !" - Rob "In the album, "WAVES", Minan (whomever she might be, never heard of her until now) produces some of the most exquisite, ethereal sounds I have ever heard. Even an advanced synthesist would have to work hard to obtain such transparent, other-worldly textures and rhythms that will surely have you tapping your toes in minutes...no, in seconds, no, in nanoseconds... I've heard lots of electronically synthesized sounds in recordings, but absolutely nothing like this. If a heavenly

angel existed, this is what she would sound like. Great stereo imaging, too. Great to listen to on headphones. Imagine..if the demo sounds this good, what about the original? And - David Lambdon Brookfield To Minan: "Quite some time ago, I bought, at Record Runner, (on Rideau Street)in Ottawa, a copy of "When I", which I am guessing must be one of your first CDs (it had a black and white homemade looking cover). Sometime earlier, I bought a cassette (that really sounded homemade) called "Wooden Bridges". Now, I surf the net, and what do I find... a web site featuring some new recordings I've never heard of until now. Last time I saw Minan in performance was at the Ottawa Beatles Convention in 1995. After that, she just disappeared. How pleasant to find that she is still making breathtakingly beautiful music. I am impressed... "Linda Thompson, former Ottawa resident now living in London, Ontario.
