Details: Open Work Stocking is a one man music project from St. Petersburg, the famous music capital of Russia. He is into a special electronic music style consisting of analogue noises, synthetic sounds and break beat which creates a sentimental atmosphere. Diademia is his debut; an album gaining its power from tender piano and synth melodies which merge with sharp digital sounds. Although it contains lots of noise and glitch elements, his sensitive melodies keep the album highly listenable among the other albums of its genre. People are affected by many events, situations and feelings they can never explain. Diademia is the album for these state of mind. says Anton.
