

Mp3 Temporary Power - Sacred Geometry

[DOWNLOAD HERE](#)

Deep fusion of musical styles where artistic inspiration is contagious. Deep meanings and hypnotic sounds, mind altering and life affirming tasteful musicianship. One of a kind, beautiful and unusual guitar work you will not hear anywhere else on earth. 8 MP3 Songs NEW AGE: Environmental, ROCK: Progressive Rock Details: With Temporary Power you will find always about the music, not so much stupid crap and egotistical silliness in the music industry....everything is about the music... As a community of modern day composers and musicians, we invent. Sometimes we unfortunately re-invent the wheel instead of improving upon what comprises the wheel. Apathy can set in with thoughts like "It has all been done" and "There is nothing new under the sun." At times I unfortunately think this way, but with meditation I start to see again and then disagree with this mind set. I think the only way we can truly do new and interesting musical material is to first be true to ourselves. This goes against what many record labels and pop music culture establish as the norm. I suggest there are no two people exactly the same and there are no two pets or plants exactly the same, either. Even though twins are closely related, they are still different and unique, thus our music should not be all the same over and over again. We are all very important to the grand stage of life. Billions unique people and we should celebrate the differences in each other and also celebrate the differences in music diversity. So the underlying theme of this recording is that there is an order to things here in our universe...a Sacred Geometry, if you will. Join me in my musical quest for this higher purpose. I think music is one of the keys to higher communication. Mozart said music touches us in ways nothing else can. I do try to send through my sound that all we have is one another. We should be very tired of all the stupid wars fought because of the silly mess about putting other people down which all starts with a very unethical belief. I have brought peace in my life by using my ears and knowing the freedom and enjoyment that comes from my musical evolution. So do you

think music is inherently higher communication? One of my deepest life goals is to make music that matters. I want to listen and and be completely here and pay attention to life, because as I observe it, every problem the world has can be resolved.
