

Vibration Problems Icovp 2011

[DOWNLOAD HERE](#)

From the contents: Preface Part 1: Keynote Lectures.- Part 2: Vibration Problems in Structural Dynamics, Damage Mechanics and Composite Materials.- Part 3: Analysis of the Non-Linear Deterministic / Stochastic Vibrations Phenomena.- Part 4: Active Vibration Control.- Part 5: Dynamics of Rotating Systems.- Part 6: Flow-Induced Vibrations, Fluid-Structure Interaction, Vibroacoustics, Aeroelasticity.- Part 7: Wave Problems in Solid Mechanics.- Part 8: Computational Methods and Mathematical Modeling in Vibrations Problems.- Part 9: Experimental Techniques, Signal Processing and Analysis.- Part 10: Vibrations of Transport Systems. EAN/ISBN : 9789400720695 Publisher(s): Springer, Berlin, Springer Netherlands Format: ePub/PDF Author(s): Nprstek, Ji - Hor ek, Jaromr - Okrouhlk, Miloslav - Marvalov, Bohdana - Verhulst, Ferdinand - Sawicki, Jerzy T.
