His guitar work on stage and as a studio musician has been admired by many throughout the U.S. Despite many opportunities to leave for greener pastures, Greg has remained at home. He lives near the beautiful mountains, forests and coastlines of the Northwest, which are a source of inspiration. Working mostly alone, he continues to release quality original music for those who love guitar and guitar/vocals. Bare Pickin' is Greg's first solo instrumental release. It is a response to many who have requested it for decades--having heard his work on past projects. Other available CD albums include: "Is This The Way," and "Bumpy Road." Greg's Book, "Meditative Guitar," is a great way to begin reading music on guitar. These and other CD's are on this site. Greg's book is easily located through web searches.
