Glam Rock in a plaid shirt and rock n' roll blue jeans. 17 MP3 Songs ROCK: Glam, POP: British Pop

Details: Mix of rock/pop/alternative styles that blend downtown dwarfs with garden hoes. Infectiously promotes repeat listening. Cool review below...way better articulation than we can come up with.

Thanks,Haas Excellent recording and mixing. Vocal performance strong, upfront, with classic grit and power when needed, layered harmonies bringing it solidly home. The songs are carefully tailored to suit the talents of all participants and gives one the opinion that there is nothing this group could not handle.

The lyrics are witty and reflective, the songs hard driving and softly beautiful as you move through the disc. The selections run the gamut from classic Rock in the tradition of the Stones, and Alice Cooper to the very impressive song OK, which, if one did not know better could/should have been a Beatles tune, to the eerie, haunting HEROIN, which evokes the feel of and is reminiscent of that classic song THE PUSHER, by Steppenwolf. All in all, Haas keeps its signature on all these tunes with a sound all their own and with it, there is more than something here for Rock fans of all stripes. Paul R.DuCharme/Orion's Belt
