A special report with FULL reprint rights so you can sell it at the full price and keep all the money, give it away FREE to get new sign ups to your ezine, or use it as a very valuable and unique free bonus with your own products to get YOUR prospects to BUY something from YOU! This is a hot report with information that can save your prospects virtually tens of thousands of dollars IF they use it well! And I bet they'll just LOVE you for showing this to them! Now, let me be totally honest with you... This special report can save you a load of money if you find the right people to deal with. However I won't kid you around or B.S. you like most people would on this. I'll be straight up front and tell you -- nothing is ever 100 guaranteed to work ALL of the time. Anyone claiming that must be a magician or... They'll promise to implement their tactics on your business themselves (as in they'll work on your business THEMSELVES so they're certain to make it work without a doubt), or... They'll in some way "guarantee" your money back -- telling you it's 100 guaranteed if it doesn't thrill you or do what they promised it would (that really means -- it might not work, and in that unfortunate situation, I'll just refund your check). Listen. Super-Computers (talk much less of normal everyday PC's) break down or come up with a glitch every once in a few years.

How many times has YOUR computer "hung" on you? Bank ATM's eat up your credit card or chuck out more or less money than you asked for, or don't even chuck any money out at all and instead chuck out your plastic card and ask you to kindly take a hike -- "Your faulty card (which really isn't faulty) can't be processed at this moment!" Has that ever happened with you? It's happened with me -- a few times. Is it the computer's fault? I'll answer that from my own experience. No. It's isn't the computer's fault. It's just part of that thing called -- life. In Life, nothing is ever PERFECT or 100 guaranteed to work without a hitch (not that I know of anyways;-) So, in the same light, what I'm about to tell you now has worked for me in closing two deals recently and getting EXPENSIVE resale/reprint/marketing rights totaling $13,789 in real money that I would have had to actually cough up IF I didn't use the method you'll read below. Last year it worked to get me close to $3,000 or so in reprint rights "savings";-) And, I will still keep using it probably till retirement. It works. Still, the same method in this report has flopped for me twice recently. I met two people and used it with them. I could have sworn they'd snap up my offer within the twinkling of an eye! But, people can be unpredictable. They didn't exactly refuse, but they didn't reply saying "Yes! oh yes!" either. You'll see later why this shouldn't even bother you one bit. For now, I want you to know that I did not invent this, neither did I create any NEW system to use it, the whole idea you'll read about now can be based in a simple theory.
