Let me answer some commonly asked questions posed to me by people just like you who later decided to invest in the Instant Video Marketing Secrets program: Q. Do I need a video camera? A. Hell yeah! Most of these

video cameras are very affordable these days. You can get every marketer's favorite Flip Video. For less than \$XX, you can capture very high quality video and audio. Most digital cameras and web cams today also give you the ability to shoot video. And even if you don't have any of these, you can easily borrow one from your friend, relative, or neighbor. There's no excuse why you shouldn't be using these video marketing strategies when the technology is cheaply available. For all the benefits you're getting, it's a very good investment.

Q. Do I have to spend more money on software? A. No. Most of the software you need comes together with your camera. You can also use Windows Movie Maker on any PC to edit video footages. Plus, there are tons of free, easy to use video editing software available for download. In fact, there are many free tutorials on the internet that teach you to use your software. And if that isn't enough, go on any video site like Youtube, type in the search bar How To Edit Videos, and you'll get several step-by-step instructional videos to guide you through the process. That's how far video technology has taken us today. Q. I'm not comfortable in front of a camera, can I still use Instant Video Marketing Secrets? A. Of course, you can use screen capture software to make PowerPoint presentations on your computer. And if talking in front of the camera freaks you out, imagine talking to a close friend when you record. It takes a little practice but it's much easier than you think. Even a 5-year-old can get good in front of a camera within 30 minutes. That's the easiest, fastest way to drive traffic than I know possible.

At this point, it's okay for you not to trust me until you try out the book and prove to yourself beyond a shadow of a doubt that my claims are all true.
